Survey Overview

The Morris Leatherman Company, is pleased to present the results of this study to the City of Elko New Market. This section provides a brief introduction to the specifications of the survey and a guide to the organization of the written analysis.

While the most statistically sound procedures have been used to collect and analyze the information presented herein, it must always be kept in mind that surveys are not predictions. They are designed to measure public opinion within identifiable limits of accuracy at *specific points in time*. This survey is in no way a prediction of opinions, perceptions, or actions at any future point in time. After all, in public policy analysis, the major task is to impact these revealed opinions in a constructive fashion.

The Principal Investigator for this study was Dr. William D. Morris; the Project Director overseeing all phases of the research and analysis was Mr. Peter Leatherman.

Research Design

This study contains the results of a telephone survey of 228 randomly selected residents of the City of Elko New Market. The average interview took twenty-two minutes.

All respondents interviewed in this study were part of a randomly generated sample of the City of Elko New Market. In general, random samples such as this yield results projectable to their respective universe within ± 5.0 percent in 95 out of 100 cases.

Interviews were conducted by **The Morris Leatherman Company**, trained personnel from telephone banks in St. Paul, Minnesota. Approximately twenty percent of all interviews were independently validated for procedure and content by a The Morris Leatherman Company, supervisor. Completed interviews were edited and coded at the company's headquarters in Minneapolis, Minnesota. Statistical analysis and cross-tabulations were produced by the company's CfMC Mentor Analysis System and SPSS 19.0 FOR WINDOWS.

Organization of the Study

The results of this study are presented in the following order:

The *Analysis* consists of a written report of the major findings. The results contained herein were also presented verbally to the client.

The *Questionnaire* reproduces the survey instrument as it was used in the interviewing process. This section also includes a response frequency distribution for each question.

Any further questions the reader may have about this study which are not answered in this report should be directed to either Dr. Morris or Mr. Leatherman.

Summary and Conclusions

Elko New Market is a growing exurban community. Since the 2012 study, the median longevity of adult residents has increased by less than one year to 12.7 years. This is over four years lower than the metro area average, but in line with other exurban areas. Nineteen percent of the sample report moving to the city during the past five years, while 27% were there for over two decades. Residents for ten years or less are more apt to be eighteen to thirty-four year olds with children. Over twenty year residents are more likely to be empty-nesters and over fifty-five year olds. Fifty-seven percent of the households contain school-aged children or pre-schoolers.

The average age of respondents is 42.5 years old. Seventeen percent of the sample falls into the over 55 year old age range, while 27% are less than 35 years old. Women outnumber men by four percent in the sample.

Summary and Conclusions

Ninety-seven percent, an increase of seven percent, rate their quality of life as either “excellent” or “good.” Only three percent rate the quality of life lower. In comparison with other Metropolitan Area suburban communities, the quality of life rating is in the top decile. The key differentiating factor for quality of life is the “excellent” ratings given by residents. A high 43%, an increase of 11%, deem it “excellent,” placing the city well within the top decile of Metropolitan Area suburbs. In fact among exurban communities, Elko New Market’s “excellent rating” is among the top three during the past five years.

“Rural and open space,” at 22%, tops the list of factors that were most important in moving to Elko New Market. Fourteen percent respectively point to “small town feel” and “housing;” while 11% each indicate their “neighborhood” and “quiet and peaceful.”

At 26%, “small town feel” leads the list of attributes people liked most about living in the community. “Quiet peaceful” and “friendly people” follow at 23% and 15% respectively. “Small town feel” is particularly important to residents with children and 35 to 44 year olds. Residents for ten to twenty years are more likely to state “quiet and peaceful” and “friendly people.”

The most serious issues facing the city are “quality of drinking water,” at 17%, and “lack of businesses,” at 15%. Residents for ten to twenty years are more likely to be troubled by the lack of businesses in the community. “Too much growth” is a concern for 12% of residents; while “high taxes” troubled 11%. Residents for more than twenty years are more likely to be concerned about the pace of growth, while men and fifty-five to sixty-four years olds were more likely to state “high taxes.” A “booster” group of 23%, more than twice as high as the Metropolitan Area norm, says there are “no” serious issues facing the community. This is a twelve percent increase from the 2012 survey in the number of “boosters.” Households with children and residents for less than ten years are more likely to be “boosters.”

Chapter Three: City Services

City Services

General Value of City Services

Property tax revenues are divided among the City of Elko New Market, Dakota County, and your local public school district. In 2012, the actual percentage of your property taxes going to the City of Elko New Market was 42 percent.

Summary and Conclusions

When property taxes are weighed against the quality of city services, 72% rate the value as “excellent” or “good.” Twenty-eight percent rate the quality as “only fair” or “poor.” The over two-to-one favorable-to-unfavorable ratio reveals a community satisfied with the cost of currently-offered city services. This rating continues to rank within the top decile of metro suburban communities; while among exurban communities, it places Elko New Market in the top

two over the past five years.

In evaluating specific city services, the mean approval rating is 91.6%, placing the city in the top decile for the Metropolitan Area suburban communities, and among top three exurban communities. The mean approval rating has increased by over ten percent in the past three years. “Excellent” ratings of city service increased by an exceptional 21% since 2012.

In looking at each individual city service, two services stand out as “best practices” in the metro area: “city street repair and maintenance” and “snow plowing.” Four services are in the top decile in comparison to metro area communities: “fire protection,” “park maintenance,” “recreation programs,” and “code enforcement.” While the final two services: “police protection” and “storm drainage” rank lower in comparison to other communities, they are both still in the top quartile.

City Service	Favorable	Unfavorable	Increase in “Excellent” Rating
Police Protection	94%	5%	29%
Fire Protection	95%	2%	21%
Storm Drainage, ponds, wetland maintenance and flood control	85%	12%	12%
Park maintenance	93%	5%	22%
City-sponsored recreation programs	93%	3%	34%
Code Enforcement	90%	6%	18%
City Street Repair and Maintenance	88%	11%	8%
Snow Plowing	95%	5%	24%
Mean	91.6%	6.1%	21%

Those rating a city services as “only fair” or “poor” were asked for a reason. Only one-third of residents fall into this category. Lack of drainage is criticized by 24%. Critics are most often 45 to 54 year olds. Street repair earns negative ratings from 21%. They are posted most often by empty nesters. And, snow plowing is viewed negatively by 16% because of a lack of thoroughness.

Forty-two percent feel the City of Elko New Market does not have any city services that need improvement. Twenty-five percent would like to see a “water treatment plant,” while nine percent would improve “street repair.” When asked if there are any city services they would like to see added in Elko New Market, ninety-four percent were unsure or stated “nothing.” This level of satisfaction with the amount and types of city services is more typical of fully developed suburbs, than exurban communities. Only five percent indicate an expansion of recreation programs.

NONE OF THE ABOVE.....	24%...	40%
DON'T KNOW/REFUSED.....	7%....	1%

Summary and Conclusions

A very strong 90% rate the amount of police patrolling in their neighborhood as “about the right amount.” Only 9% think the amount is “not enough.” Seventy-seven percent rate the amount of traffic enforcement by the police in their neighborhood as “about the right amount.” Twenty-one percent, though, think it is “not enough.” These combined ratings of police patrolling are among the top ten percent of communities across the Metropolitan Area and among the top three exurban communities.

Thirty percent think the problem of traffic speeding in their neighborhood is either “very serious” or “somewhat serious.” Seventy percent see it as “not serious.” Twenty-two percent view the problem of stop sign violations in their neighborhood as either “very serious” or “somewhat serious.” Seventy percent think it is “not too serious” or “not at all serious.” Both levels of concern are consistent with other suburban communities.

Twenty-nine percent think the greatest public safety concern in Elko New Market is “traffic speeding,” while 15% see it as “youth crimes and vandalism.” It is important to note from the previous question on the seriousness of traffic speeding, only seven percent rated the problem as “very serious.” Although traffic speeding leads the list of public safety concerns, it is a “soft”

concern. Forty percent think “none” of the enumerated public safety concerns are a problem in the city; typical among exurban communities, but more than double the metro area suburban average.

Summary and Conclusions

The household use during the past year of existing facilities in the park system was examined in some detail. Eighty-four percent report members using the trails and sidewalks. Seventy-two percent visit the smaller neighborhood parks, and 66% visit large community parks. Forty percent use the community ball fields, while 31% report usage of the ice rinks. Thirty-nine percent indicate using the Wagner Park Shelter and 19% use the skate park at Wagner Park. Park facility users are most apt to be households containing children and twenty-five to forty-four year olds. Non-users are more frequently over twenty year residents, empty-nesters, and over 55 year olds. When comparing Elko New Market to communities with similar demographics, use of park facilities is among the top quartile of cities.

Users were asked to rate each specific facility. Across all park facilities, a very high 93% of users rate the facility positively. These park facility ratings place the city within the top ten percent of cities across the metro area and among the top three exurban communities.

Park Facility	Change in Usership	Favorable	Unfavorable
Larger Community Parks	+10%	61%	5%
Smaller Neighborhood Parks	+20%	67%	5%
Trails and Sidewalks	+9%	78%	6%
Community Ball fields	-3%	37%	3%
Wagner Park Skate park	-11%	18%	1%
Ice Rinks		28%	3%
Wagner Park Shelter		36%	2%

Eighty-nine percent of the residents feel that existing recreational facilities offered by the City meet the needs of their household. Ten percent disagree, citing the lack of ice rinks, tennis courts and community center. Disagreement is higher among households of children and twenty-five to thirty-four year olds.

Ninety-three percent similarly feel that existing recreational programs offered by the City meets the needs of their households. Six percent disagree, citing particularly the lack of sports programs for youth and adults. This level of satisfaction with recreational programs is right at the norm for the metro area, and about ten percent higher than the exurban community average. Again, disagreement peaks among households with children and twenty-five to forty-four year olds.

Forty-two percent, an increase of 9%, report household members participated in a City park and recreation program, especially households with children and twenty-five to forty-four year olds. The most popular are baseball/softball programs, accounting for almost two-thirds of the participation. Among participants, a high 91% are satisfied with the experience. Combining the use and rating of recreation programs, Elko New Market places among the top 10 communities across the metro area.

Ninety-eight percent believe existing community events offered by the City meet the needs of their households. When comparing Elko New Market to communities with similar demographics, this level of satisfaction with community events is twelve percent higher than the average. Seventy-seven percent, an amazing increase of 36%, of community households participate in community events. Participation levels are higher among residents for ten years or less, households with children, and twenty-five to forty-four year olds. They are lower among over fifty-five year olds. Among participants, 21% attended “Night to Unite,” particularly households with children and residents for more than ten years. Twenty percent attended “Fire & Rescue Days,” especially men; and 17% went to the “Parade,” particularly households with children and women. Ninety-nine percent are satisfied with their experiences there. Combining the use and rating of community events, places Elko New Market among the top three communities across the metro area.

About one-half of the users of Facebook and Twitter report they are likely to use that social media to obtain information about the community.

Chapter Eight: Concluding Thoughts

Concluding Thoughts

Elko New Market residents have become more engaged and enthusiastic about their city and its services. While favorable ratings have improved from the 2012 study, the key change is the large increase of “excellent” ratings on numerous questions. The key issue continuing to face decision-makers in the future is maintaining the “small town ambience” and attracting more businesses to Elko New Market. With the “City Booster” percentage at 23%, more than twice the suburban norm, the reservoir of goodwill has been expanded; this will continue to serve decision makers very well as new issues are encountered and hard decisions must be made. It is clear from the results, the City Council and staff made significant improvements in areas of concern from the 2012 survey. The results of these changes have made a major positive impact in the quality of life for residents in Elko New Market.
